Professional Summary

Computer Science Engineering student passionate about Artificial Intelligence, AI automation, backend development, and modern web technologies. Experienced in building RAG-based AI assistants, AI workflow automation using n8n, and Python applications. Interested in developing intelligent systems using Large Language Models (LLMs), vector databases, APIs, and automation tools.

Technical Skills

- **Programming Languages:** Python, C, JavaScript
- **Frontend:** HTML, CSS, React.js (Learning)
- **Backend & APIs:** FastAPI, REST APIs, GitHub API Integration
- **Artificial Intelligence & NLP:** Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Natural Language Processing (Basics)
- **AI & Automation Tools:** Ollama, ChromaDB, Sentence Transformers, n8n Automation, Google Gemini API
- **Development & Tools:** Streamlit, Git, GitHub, VS Code, Vector Databases

Experience

Artificial Intelligence Intern – My Job Grow

Duration: Jan 2026 – Mar 2026 (2 Months)

- Completed an online internship focused on Artificial Intelligence and cloud-based AI solutions.
- Worked on AI-related problem statements and capstone projects involving data analysis and AI workflows.
- Learned AI fundamentals in cloud computing, AI data processing, and cloud-based AI model development.

- Improved analytical thinking, problem-solving, collaboration, and project management skills.
- Gained exposure to scalable AI systems and end-to-end AI solution development.

Projects

EduRAG – AI-Powered Education Knowledge Assistant

Technologies: Python, ChromaDB, Sentence Transformers, Ollama, Mistral, Streamlit

- Developed a Retrieval-Augmented Generation (RAG) chatbot that retrieves knowledge using vector search.
- Integrated Mistral LLM through Ollama for context-aware AI responses.
- Implemented semantic search using Sentence Transformers and ChromaDB.
- Built an interactive Streamlit web interface.

GitHub: github.com/kru2803/college-rag-chatbot

AI-Powered Student Study Planner

Technologies: n8n, Google Gemini API, Gmail API, AI Agent

- Designed an AI automation workflow that generates personalized study schedules.
- Collected user inputs including subjects, study hours, goals, and deadlines.
- Used Gemini AI agent to generate structured study plans.
- Delivered generated plans via Gmail using n8n automation.

GitHub: github.com/kru2803/ai-study-planner-n8n-gemini

Cafe POS System

Technologies: Python

- Developed a Python command-line POS system for cafés.
- Automated order processing, menu selection, and billing.
- Implemented coupon discount logic using Python data structures.

GitHub: github.com/kru2803/Cafe-POS-system

Education

Bachelor of Engineering (B.E.) – Computer Science Engineering

Pune District Education Association College of Engineering

2024 – 2028

Higher Secondary (12th) – Science

Nowrosjee Wadia College, Pune

Secondary School (10th)

Sinhgad Institute

Interests

- Artificial Intelligence
- AI Agents & Automation
- Backend Development
- Frontend Development
- Building AI-powered Applications
